

SETUP MOUNTS (If required, should be correct)

Go to **MENU > SETUP > VIX > MOUNT MANAGER** and make sure USB/HDD is mounted as:

/media/hdd and **ext4 R/W**.

SETUP TUNERS (If required)

MENU > SETUP > TUNER CONFIG > TUNER SETUP

Sat tuners should be okay.

Cable tuners – Leave Network ID as 00000 and change country to UK:

SETUP AUTOBOUQUETSMAKER REGION (CABLE)

MENU > SETUP > TUNER CONFIG > AUTOBOUQUETSMAKER > PROVIDERS

(Takes a minute for providers to populate)

Change Sky (UK) area to your region

Change Virgin (UK) area to your region. (NetID)

Press green button OK and highlight 'Start Scan' and press OK.

Red button - exit when complete.

I've set this build up using dsayers2014's custom mix which combines working Sky channels with VM HD channels in the first bouquet.

For Sat or Cable only:

Menu>Setup>Tuner Config>ABMCustomMix Importer

Set 'enable autofetch' to no & Blue button (Delete File)

EPG (Set to save to /media/hdd/)

MENU > SETUP > SYSTEM > EPG > EPG IMPORTER > YELLOW BUTTON (Manual)

Sources are set to jenseneverest Sky & Vermin UK

Just uncheck either provider if only using one of them.

LINES/SOFTCAMS

A line is a subscription that you buy to unscramble the premium channels like sport and movies.

I have produced a guide on softcams and lines here: <https://willobuild.yolasite.com/utilities.php>

WilloBuild is set up to use Oscam as default but Cccam and Mgcamd are included, dependant on processor type.

If toppicks doesn't update see guide [here](#)
